

# Agriculture Grade TerraPro®

## Humus Based Soil Conditioner

**76% Humic Acids** using the A & L Agriculture Laboratories analysis method

**53% Humic Acids** using the California analysis method (excludes the Fulvic acid fraction)

**Humic acids are not a plant or microbial food**

Humus is the common word for the more technical term **Humic Substances**. Within Humic Substances are the Humic Acids, which are powerful bio-molecules of nature involved in hundreds if not thousands of bio-geo-chemical functions, essential for soil.

**Ingredients:** Humic Substances saturated with enzymes & SUPRAPLEX® – an organic liquid broth derived from **TTP Supreme Compost®** a product of Soil Secrets LLC which is made from farm grown legumes, corn silage, bean protein and sapwood cellulose.

Animal manures are not used in the making of this product or the ingredients of this product.

### **Application Rate:**

Apply one bag to 1000 square feet, onto the surface and water in. Can also be lightly cultivated into the top ¼" to ½" inch. Going deeper is not necessary. For best results also apply ½ bag of Protein Crumbles over the same 1000 square foot area at the same time. In Agriculture Ag Grade TerraPro is applied at rates as low as 200 pounds per acre.

**Direction for Use:** Top dress and water in immediately after applying. Terra Pro can either be used as a stand alone product on all landscapes, farms, or gardens or combined with our Protein Crumbles. Can also be used on all house plants at 1 teaspoon per 1 gallon size pot as a top dress.

**Not for human, livestock or pet consumption.**

**Soil Secrets, LLC**
