

SOIL SECRETS

Unlocking the Secrets of Healthy Soil

EndoMaxima[®]

Mycorrhizal Seed Inoculant Concentrate

Active Ingredients: *Glomus intraradices* @ 1,450,000 spores/lb.

Mycorrhizae are a beneficial plant fungus that are known to help plants uptake Phosphorus and other mineral nutrients. This product is non-pathogenic to plants, humans, livestock or poultry. Soil Secrets products do not contain products or ingredient derived from GMO plants.

Does not contain animal manures.

Application: Inoculation is best achieved by placing the spores of this inoculant in direct contact with the seed or roots of the potential host plant. Dusting onto the seed or bare roots is effective. Can also be mixed into a hydro-mulch slurry for hydroseeding.
